# THE CALLING CARD OF THE HOUSE

Semi-public and public buildings such as hotels and prestigious properties require solutions that meet high standards of comfort and design. In public toilets, the customer experience is significantly influenced by intuitive operation and the flawless functioning of the WC suite. Geberit system solutions for WCs, urinals and washbasins are the first choice for sanitary facilities that present the operator in the best light.

<p><b>1</b></p> 		
<p><b>2</b></p> 		
<p><b>3</b></p> 		

**1 WC SOLUTION FOR HIGH DEMANDS ON DESIGN, FUNCTION AND HYGIENE**  
 with: Geberit ONE WC – Geberit Sigma80 actuator plates – Geberit Duofix WC installation element

- Rimfree® WC ceramic appliance
- WC seat ring and WC lid with SoftClosing and QuickRelease
- TurboFlush flush technology with ideal flushing out and reduced cleaning effort
- Automatic flush actuation after use
- Manual touchless dual flush actuation possible

**2 EASILY MAINTAINED AND EASILY CLEANED URINAL WITH STATE-OF-THE-ART ELECTRONICS AND INDIVIDUALLY ADJUSTABLE FLUSH FUNCTIONS**  
 with: Geberit Preda urinal – Geberit urinal division – Geberit Duofix urinal installation element

- Rimless urinal with spray head
- Automatic flush actuation
- Easy access and quick replacement of all functional parts
- Direct access to the drainage system without dismantling

**3 VERY HIGH-QUALITY AND HYGIENIC WASHBASIN SOLUTION WITH INVISIBLE TRAP**  
 with: Geberit ONE washbasin – Geberit Brenta wall-mounted tap – Geberit Duofix washbasin installation element

- Touchless wall-mounted tap with intuitive operation
- Washbasin with horizontal drain
- Minimal cleaning effort: Combination of wall-mounted tap and washbasin with horizontal drain
- Fully integrated thermostat function with high user convenience and scald protection
- High vandal resistance due to integration of the wall-mounted tap into the installation element

**RETURN ON INVESTMENT**  
 A larger initial investment compared to the Geberit standard solution pays for itself over the years of operation through low operating and maintenance costs, and at the same time improves the customer experience.

**CONTRIBUTION TO CERTIFICATION**  
 The product features of the Advanced solution can have a positive effect on building certifications.

WASHBASIN SOLUTION FULFILLS THE RECOMMENDATIONS OF THE COMMISSION FOR HOSPITAL HYGIENE AND INFECTION PREVENTION (KRINKO)

# VERSATILE FOR ALL REQUIREMENTS

Public sanitary facilities with high user frequencies, for example at transit facilities, exhibition centres, sports facilities or shopping centres, are subject to high requirements. Reliability, hygiene, protection against damage, and ease of maintenance are the main focus here. The combination of high product quality and simple maintenance, together with the long-term supply of spare parts, forms the basis for straightforward operation and a long service life.

# TAKING TOTAL COSTS INTO ACCOUNT BEYOND THE TIP OF THE ICEBERG

Looking at investment costs alone is just the tip of the iceberg. As the useful life increases, the operating costs for cleaning, maintenance and water and energy consumption add up and have a significant impact on the economic efficiency of sanitary facilities in semi-public or public buildings. The total costs for the Advanced, Standard and Entry product combinations were calculated taking into account the one-off costs\* to provide decision-makers with a complete cost overview.

## SUMMARY

The Advanced solution is the ideal choice over an observation period of 10 years. The higher purchase price of the Advanced solution will pay off over years of operation through lower operating costs.

## COMPARISON OF THE TOTAL COSTS FOR THE WC SYSTEM

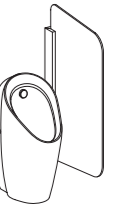

Water consumption\*\* and cleaning costs are significantly reduced thanks to innovative Geberit solutions such as TurboFlush flush technology. This also reduces the risk of

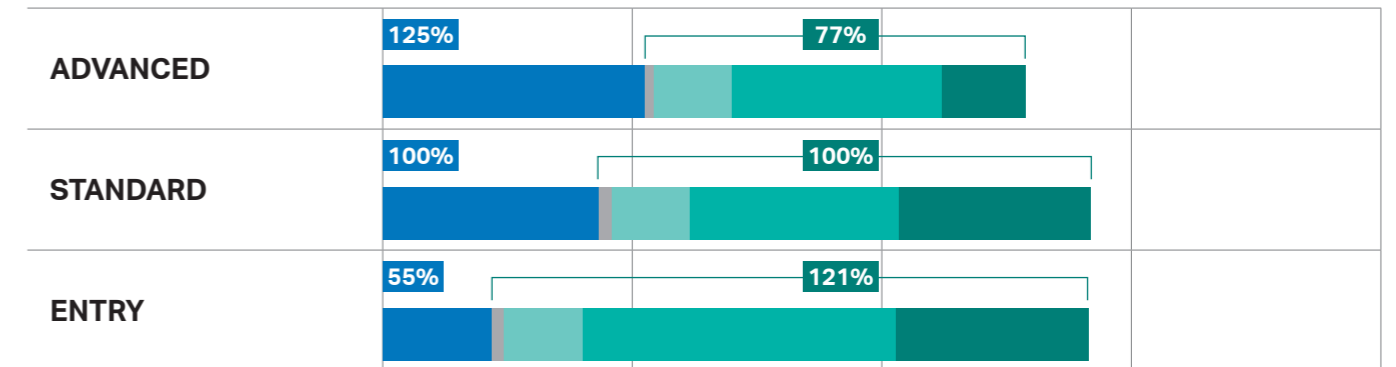

blockages. High-quality products in the Advanced solution range, such as the touchless Design actuator plate and WC with TurboFlush, enhance the customer experience.

\*Basic assumptions: Useful life: 10 years; number of operating days/year: 250 (50 weeks of 5 days each); user frequency per day: medium (WC = 50; UR = 50; washbasin = 100); hourly rate for installer: 80 EUR/h; hourly rate for building systems & cleaning: 40 EUR/h; water price incl. waste water: 5 EUR/m<sup>3</sup>

\*\*Water consumption for WCs with TurboFlush 4 L: Reduced quantity can be set on the cistern (factory setting 6 L)

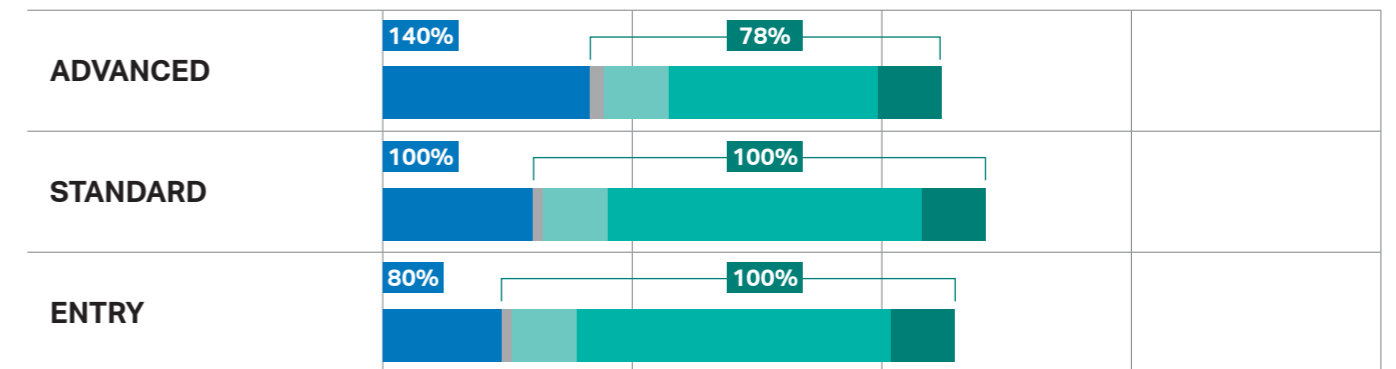

## COMPARISON OF THE TOTAL COSTS FOR THE URINAL SYSTEM

Rimless urinals with a spray head can significantly reduce cleaning costs. Maintenance costs are greatly reduced thanks to the integrated and easily accessible control unit, as well as simple and quick access to the drainage system without dismantling the urinal.

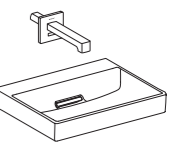

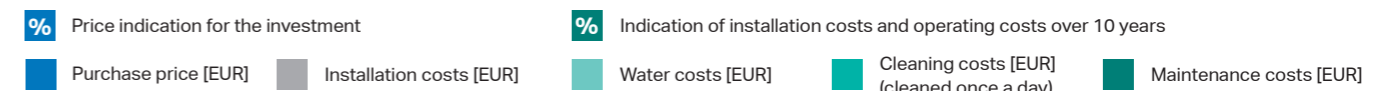

Innovative products in the Advanced solution range, such as the modern, ergonomically designed urinal ceramic and the high-quality Design urinal partition made of glass, enhance the customer experience.

## COMPARISON OF THE TOTAL COSTS FOR THE WASHBASIN AREA

Cleaning costs are significantly reduced by the wall-mounted tap and the washbasin with horizontal drain. Innovative products in the Advanced solution range, such as the wall-

mounted tap with thermostat function and the washbasin with horizontal spout, improve the customer experience.
